**RePod**

A complete set of recycled plastic optimization in one Refillable ECO Airless Jar, **RePod**, is an aesthetical presentation for clean beauty and organic skincare solutions.

The mint green ECO Airless Jar is the original resin tone of recycled ocean waste plastic that is the post-use fishing net, fishing gear, and trawls collected from the maritime industry. The reusable pump, cap, and collar are post-consumer recycled PP resin. The crystallly clear reusable case is chemical recycled PCR resin.

SR Packaging innovates packaging with sustainability. It makes all bottles, jars, dispensing solutions, and tubes available with customizable recycled materials, helping skincare, personal care, beauty, and cosmetic companies to build measurable success with advanced technology and high efficiency.

Its exclusive ECO Airless design reduces 70% plastic usage, uses post-consumer recycled resin, and keeps plastic in the consumer usage loop.
