## Oval Tubes & Disc-top Caps

Disc-top caps bring convenient usage for personal care solutions. With a light press down on the top of the disc-top closure, an orifice reveals to allow users to dispense products. After usage, press down on the raised end of the disc-top cap to securely close the product.

The PP disc-top caps with flexible, chemical-compatible plastic tubes deliver easy-to-use personal care items from head to toe.

The tubes have material options of:

- PCR tubes (post-consumer recycled plastic)
- Sugarcane tubes (Biomass plastic, byproduct of sugarcane, green PE)
- ABL tubes (aluminum barrier laminate)
- POLYLAMI tubes (the ABL tube coated in the PE layer for extra protection)

D35 oval tubes: 50 ml ~ 130 ml  
D40 oval tubes: 60 ml ~ 140 ml  
D50 oval tubes: 100 ml ~ 250 ml
