

# EBM Airless Bottles

Extrusion Blow Molding Airless Bottles  
are Lighter, Reliable, and  
Cost-competitive.

The conventional syringe-type airless bottle has multiple parts that require assembling and is costly, narrowing business possibility to solely prestige concentration or serum booster. But now, the extrusion blow molding EBM Airless Bottle is lighter, more reliable, and requires no assembling. The cost-competitive design uses plastic 70% less than the syringe type. It broadens the applications from skincare to toiletries.

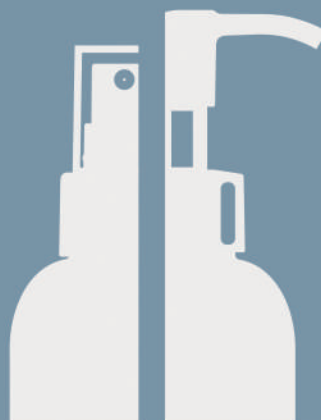

From 30 ml to 250 ml, it guarantees product quality without preservatives or additives, an opportunity to transform commodities into organic, clean beauty.

The pumps are for all viscosity.

Transform the current toiletry line with botanical input to satisfy the latest consumer demands.
