

# Brushed Metal ABL Tubes

[www.srpackaging.com](http://www.srpackaging.com)

## Brushed metal decoration on ABL tubes

The decoration mimics the unidirectional satin finish on metal and creates an aesthetic pattern on ABL tubes.

On top of the brushed-metal finish, companies can apply silkscreen, hot stamping, offset, and flexo-printing to add further customization.

The applicator is not limited to nozzle tube.

More variations and capacity ranges are available upon request.

[View options in the catalog.](#)

Nozzle tube diameters:  
D19, D22, D25, D30  
Capacity: 8 ml to 65 ml

## **ABL tubes**

The aluminum barrier laminate tube, or ABL tube, is widely used for oral care, healthcare, pharmaceuticals, personal care, cosmetics, skincare, makeup, and hair treatment products.

Comprised of aluminum/PET foil and PE, the ABL tube is equally compatible with solvent-based acid or alkaline products.

The impermeable and impenetrable properties of foil provide superior protection to contents, keeping them fresh and uncontaminated even through long periods of intermittent use.

## The different material and thickness of ABL Tubes

**Silver Aluminium sheet** is the material for making brushed metal ABL tubes.

White aluminium sheet	Silver aluminium sheet	VMPET silver sheet
220 µm	-	-
275 µm	275 µm	-
310 µm	-	310 µm
-	-	360 µm
390 µm	390 µm	-
-	-	400 µm
