

30 ml EBM AIRLESS for
water-free skincare formula

STRATIA C+C Serum vitamin c treatment

www.stratiaskin.com

SR Packaging North America Inc. provides recyclable 30 ml EBM AIRLESS made of post-consumer recycled plastics to the LA-based STRATIA Skincare for its water-free formula, C+C Serum Vitamin C treatment.

The packaging update enhances the product with a positive environmental impact, and the airless pump, optimized for cold climates, ensures a seamless usage every time.

46% post-consumer
recycled plastic

70% plastic saved

31% environmental
impact
reduced

No pump fails. No wasted product.

Just smooth, seamless C+C Serum application—every time.

SUSTAINABLE EBM AIRLESS Technology

The EBM AIRLESS bottles are lighter and reliable, with a simpler structure that uses 70% less plastic than the previous version. Being recyclable, the bottles are made with 46% recycled material (post-consumer recycled plastic). The enhancement reduces environmental impact and also allows users to use the product till the last drop, without leaving residue in the bottle.

WITHSTAND TEMPERATURE CHANGE

The incorporated airless pumps are specially engineered and optimized for cold-heat-cold temperature changes, ensuring a seamless dispensing experience without failing.

EBM AIRLESS has a thin airless pouch that contracts and separates from the exterior wall.
